

WE BRING THE HEAT ON DEMAND

MOBILE HOT WATER

When hot water is critical to your business, our mobile Hot Shot unit will keep the doors open, preventing down time and lost revenue.

HOW IT WORKS...

Our fully equipped trailer connects directly to your existing water system and supplies high-volume hot water in the event of line break or outages. Setup is fast, reliable, and guarantees you stay fully operational—without disruption to guests, tenants, or production.

Lexington Plumbing's **Mobile Hot Shot** will keep your business **fully operational** so you don't get into hot water.

DIRECT CONNECTIONS

ON DEMAND

BENEFITS INCLUDE:

EFFICIENCY

Provides up to 1,000 gallons of usable domestic hot water per hour.

EASY ACCESS

Seamlessly connect to your existing water services. Foodgrade hoses are ideal for restaurants, retail and institutional use.

COST SAVINGS

Avoid temporary shutdowns or additional costs while repairs are being made.

FULL SERVICE PLUMBING SPECIALISTS SINCE 1945

24/7 EMERGENCY SERVICE

MOBILE HOT WATER

Hot water without interruption with direct connection to your existing water system.

DRAIN CLEANING

Accurately diagnose and clear line obstructions on any drain.

HYDRO JETTING

Remove tough clogs like roots, grease, and other debris.

EXCAVATION

Fast, cost-effective excavation for water, gas, and sewer lines using our own equipment.

HYDRO EXCAVATION

High pressure water excavation reduces the risk of damaging utilities and getting you back in service faster.

FULL SERVICE PLUMBING SERVICES INCLUDE:

PLUMBING SYSTEMS

Our skilled technicians handle plumbing repair, replacement, and installation efficiently for all plumbing needs.

BACKFLOW TESTING

Stay in compliance with local water districts with testing and repair of backflow devices.

CAMERAS

Over 20 camera units help us locate drain lines, analyzing and identifying issues to provide recommendations for long-term solutions.

POOL HEATERS

Reliable and affordable pool heater installation and service.

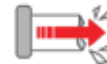

FREEZE MACHINE

Line-freezing keeps buildings running and tenants happy while we make your tie-in or valve change with no major disruption to business.

LEAK DETECTION

Our specialized equipment detects underground leaks in water mains, gas lines, and pools without causing property damage.

TRENCHLESS PIPING

We offer both pipelining (CIPP) and pipe bursting as an alternative to conventional replacements. Potentially saving on costs and minimized disruption to daily operations.
